<b>3</b>	<b>Precoding Design</b>	<b>5</b>
3.1	Transmit channel side information	6
3.1.1	The MIMO channel	6
3.1.2	Methods of obtaining CSIT	8
3.1.3	A dynamic CSIT model	10
3.2	Information-theoretic foundation for exploiting CSIT	13
3.2.1	Value of CSIT in MIMO systems	13
3.2.2	Optimal signaling with CSIT	16
3.3	A transmitter structure	18
3.3.1	Encoding structure	18
3.3.2	Linear precoding structure	20
3.4	Precoding design criteria	22
3.4.1	Information and system capacity	23
3.4.2	Error exponent	23
3.4.3	Pair-wise error probability	24
3.4.4	Detection mean squared-error	26
3.4.5	Criteria grouping	27
3.5	Linear precoder designs	28
3.5.1	Optimal precoder input-shaping matrix	28
3.5.2	Precoding on perfect CSIT	29
3.5.3	Precoding on correlation CSIT	32
3.5.4	Precoding on mean CSIT	34
3.5.5	Precoding on both mean and correlation CSIT	37
3.5.6	Discussion	41
3.6	Precoder performance results and discussion	42
3.6.1	Performance results	42
3.6.2	Discussion	46
3.7	Applications in practical systems	47
3.7.1	Channel acquisition methods	47
3.7.2	Codebook design in closed-loop systems	50
3.7.3	The role of channel information at the receiver	51
3.7.4	Precoding in emerging wireless standards	52
3.8	Conclusion	53
3.8.1	Other types of CSIT	53
3.8.2	Open problems in exploiting CSIT	53
3.8.3	Summary	53
