# In-Class Activity 7

In regards to the binary search tree shown below, and its root is 4, perform:

- 1) Rotate right around 7.
- 2) Rotate left around 9.
- 3) Rotate left around 4.
- 4) Rotate right around 4 (as an exercise).

Lastly, 5) write how you would explain to a person over the phone about how the height of a binary search tree affects operations performed on the binary search tree.
